PART TWO

Describe your program's action item accomplishments since your last report was submitted.

Since our last assessment we continued the following changes:

1. We have received CACREP accreditation for an additional 7 years.

PART THREE

Summarize changes and improvements in **curriculum, instruction, and learning** that have resulted from the implementation of your assessment program. How have you used the data? What have you learned? In light of what you have learned through your assessment efforts this year and in past years, what are your plans for the future?

Changes and/or improvements in curriculum, instruction, and learning will be implemented as a result of discussing the data collected over the last year:

- 1. Job placements during the pandemic were excellent
- 2. Retention was strong.
- 3. Moved our curriculum back to primarily in-person instruction based on student feedback and improved safety.
- 4. We will begin a new format of digital data collection to improve survey response numbers and address the lack of survey responses from internship supervisors specifically.

In addition the following data will be shared with faculty at the upcoming fall retreat:

> Program Objective 1: Admit candidates that display the required academic preparation and professional depositions necessary to succeed in the CHE program

Based on the data, our admission continues to work well and we have continued to improve the diversity of our programs. We have continued high placement rates which re-enforces that we have selected students that have the academic and professional depositions necessary to succeed.

- > Program Objective 2: Depth of Content Key Performance Indicators, Course Assessments, Exams:
 - Data collected indicated most of the course objectives were perceived as met.
 - Counseling students obtained 90% pass rate NCE exam.
 - School students obtained 100% pass rate on the PEL.
 - Students obtained 100% pass rate on the comp exam in the fall and 100% pass rate for those students who took it in the spring. One student initially did not pass and then passed on their second attempt.
- > Program Objective 3: Candidates will display evidence of a depth of content knowledge and skill along eight core competencies using key performance indicators as outlined in the latest CACREP standards
 - Data collected indicated most of the course objectives were perceived as met.
 - Counseling students exceed mean score on Clinical and School criteria.
 - Obtained 90% pass rate with 1 student failing the NCE exam. That student plana to retake at the next opportunity.
 - School students obtained 100% pass rate on the PEL.

- Supervisory evaluations were positive.
- > Program Objective 4: Candidates will display evidence of maintaining professional dispositions throughout the program
 - We spend considerable time ensuring our students maintain a professional disposition throughout the program. We had one student who was asked to leave the program while the rest remained in good standing.
- > Program Objective 5: Candidates will display evidence of effective communication, critical thinking, and problem solving skills.
 - Based on Practicum and Internship supervisor surveys (5630, 6902, and 6922), students met or exceeded expectations on both the core CACREP components and global indices.
 - Students met and/or exceeded expectations on Ethics paper, cultural interview (one did not meet), and career theory paper.
- > Program Objective 6: Candidates will display evidence of advanced scholarship through research and/or creative activity.
 - Counseling students are doing very well in their understanding of Scholarship and Research. 92% of the students met or exceeded expectations on the Research Proposal (CHE 5500).
 - We had percent of our tested students exceed the national mean scores on the NCE.
 - We had a 100% pass rate in the fall and 100% pass rate in the spring on the comprehensive exam.
 - Students agreed that course objectives in CHE 5500 were met.
 - Lastly, based on the Internship Supervisor survey (items 8a and 8b) and the Practicum Supervisor survey (item 8), students met or exceeded expectations. What is interesting is that most of the Internship respondents did not observe interns in regards to their knowledge or practice of research. Given the practical nature of internship, perhaps this fact is not surprising.
- ➤ Program Objective 7: Candidates will display evidence that they have fulfilled the CHE mission to become qualified, ethical and culturally competent counselors
 - Student Surveys: The vast majority of respondents indicate we are meeting expectations on Key Performance Indicators and overall have a positive experience as a student.
 - Internship Supervisor Surveys: Results we inconclusive based on a lack of survey responses.
- ➤ Based of feedback from the data from this report including the survey data, the following **action items** were created:
 - 1. Document In the minutes that Spangler (Unit B) attends meetings, votes on curricula, and participates in student review. From Provost Gatrell: "engagement with policy and governance is possible and a reasonable expectation for primary duties".
 - 2. Clarify the ratio of Core Faculty to students on a yearly basis (see CACREP standard for calculating the ratio).

- 3. Document in the minutes the job description of the CACREP Coordinator. Document the meeting between the CACREP coordinator and Chair perhaps a monthly meeting with email documentation. CACREP requires year-round leadership so 3 cu's should be put on workloads for Fall, Spring, and Summer.
- 4. The mission statement for counseling should be revised to better match the program objectives now listed on the webpage. I suggest a review of mission statements from other CACREP approved programs.
- 5. New CACREP standards will require an advisory group. They could be convened in the Fall, and one item to work on could be a new mission statement. Document the proceedings.
- 6. CACREP recommended that syllabi be standardized so several sections of the same course look the same. An example would be Practicum. I would choose one and work with instructors to make sure they look the same. By same we mean they follow CACREP required syllabi items (see standards). This recommendation would apply to any course with multiple sections/instructors such as Basic Skills, Group, Appraisal, etc...
- 7. Make sure the reports on the webpage are up-to-date. I would recommend we only include the SLAP and the CACREP vital statistics.
- 8. Make 5400 a permanent course and send it through the curriculum committees.
- 9. According to the CACREP visiting team, the following standards were not easily located: 5.C.2.d; 5.C.1.e; 5.C.2.d; 5.C.2.d; 5.C.2.d; 5.C.3.a, and 5.C.3.b. I would review these particular items to ensure the standards are clearly identified.
- 10. New Intro courses in Counseling and CSA should be explored at the undergraduate level. The graduate Dean thought the 4900 level should be used so both undergraduate and graduate students could take it.
