

Department of Chemistry and Biochemistry

Research Celebration

Wednesday, November 9, 2022, 5:00 – 7:00 pm

Physical Science Building 3rd floor

Research Areas:

- ❖ **Molecular biological probes and fluorescence microscopy**
- ❖ **Energy storage and electrochemical catalysis**
- ❖ **Coordination chemistry for sensing and imaging applications**
- ❖ **Computational discovery of materials for catalytic reactions**
- ❖ **Zinc metallobiochemistry and Bacterial carbon metabolism**
- ❖ **Supramolecular assembly: synthesis of mechanically interlocked molecules**
- ❖ **Organic synthesis of basket-shaped molecular containers**
- ❖ **Synthesis of organic materials**

Important reasons why you should stop by:

- ✓ **Find out about research projects within the department!**
- ✓ **Great opportunity to meet Chemistry & Biochemistry students and faculty!**
- ✓ **Find out about your future fame and glory: publications, presentations, scholarships!**
- ✓ **Learn about exciting science!**
