Subject: Information Request

President Perry:

In connection with my remarks on recruiting to Faculty Senate and with our discussion with the President's Roundtable, I would like to request the following information:

- 1) The ACT scores of our incoming Freshmen, cross-indexed by ethnicity. [If this information has already been compiled or can very easily be compiled for the past 5 years or so, that would be great, too. If it does not exist for those years, then only this year's class will be OK.]
- 2) The number of students, over the past 5 years, enrolled as a result of any provision that allows students to be admitted while falling short of our usual admissions standards. This includes the Gateway program, students admitted through Presidential invitation (I don't remember what that program is called, but I know it exists), etc.

Both sets of data should be easily acquired, and would be valuable to me (and, I hope, to others) as we work our way towards achieving our goals for the University.

Thanks and Regards,
Grant
